1.0 Introduction

This document is written for programmers of Merchants that wish to electronically receive charge-back and adjustment notifications. These file layouts allow a Merchant to extract data and create organizational reports and/or online systems.

1.1 File Availability

New chargebacks are available daily at 10:30 P.M. Mountain Standard Time. Chargeback files may be downloaded once a day, and remain on the system (available for retrieval) for 15 days.

1.2 Communication Requirements

Data files may be retrieved via Personal Computer (PC) or mainframe, using a dial-up connection or dedicated line. Note: Communications testing is required.

An American Express Representative acts as the primary contact during all development phases, until the Merchant is approved for production.

1.3 Record Overview

The Chargeback Data File has three basic record types:

- File Header Record The first record in the file; contains basic file information, like the Service Access ID (SAID), data type, file creation date and time, etc.
- Detail Records Records that appear between the file header and trailer records that contain specific details for individual chargebacks (for American Express-generated chargeback files downloaded by the Merchant).
- File Trailer Record The last record in the file; contains information similar to the file header record.

2.0 Defined Chargeback Notifications (CBNOT) File Specifications

This section contains technical file specifications for the following records:

- 2.1 CBNOT File Header Record
- 2.2 CBNOT File Detail Record
- 2.3 CBNOT File Trailer Record

These records are used to send chargeback/adjustment notifications from upstream systems, through STARS* and third party software that can be used to access the data supplied by American Express.

^{*} STARS = Split, Transmit And Receive System — An American Express developed software utility that supports multiple transmission methods with which data can be exchanged between American Express and its external information trading partners.

2.1 CBNOT File Header Record

Length of Record:	2202 bytes			
Description:	contains merchant identification, file crea	The Chargeback Notifications (CBNOT) File Header Record contains merchant identification, file creation date and time, and number information that is used to identify the file and prevent duplicate file processing.		
Fields in This Section:	1. REC_TYPE	Page 8		
	Amex Application Area			
	2. AMEX_APPL_AREA	Page 8		
	STARS Area			
	3. SAID	Page 9		
	4. DATATYPE	9		
	5. CCYYDDD	10		
	6. OHHMMSS	11		
	7. FILLER	11		

See summary table for the CBNOT File Header Record on page 94.

Field 1 REC_TYPE

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position:

Description: This field contains the constant literal "H", a *Record Type* code

that indicates that this is a Chargeback Notifications (CBNOT) File Header Record. This field must appear as the first item in

the record.

Field 2 AMEX_APPL_AREA

Length of Field: 100 bytes

Field Type: Alphanumeric

Field Position: 2-101

Description: This field contains the internal American Express data below:

Subfield Name	Length	Field Type	Position
APPLICATION_SYSTEM_ CODE	2 bytes	Alphanumeric	2-3
FILE_TYPE_CODE	2 bytes	Alphanumeric	4-5
FILE_CREATION_DATE	8 bytes	Alphanumeric	6-13
FILLER	88 bytes	Reserved for future use (character space filled)	14-101

Note: See Global Inquiries Technical File Layout (POS020066-1) for more information.

Field 3	SAID
Length of Field:	6 bytes
Field Type:	Alphanumeric
Field Position:	102-107
Description:	This field contains the American Express-assigned, six-character, <i>Service Access ID (SAID)</i> .

Field 4	DATATYPE
Length of Field:	5 bytes
Field Type:	Alphanumeric
Field Position:	108-112
Description:	This field contains the constant literal "CBNOT", a <i>Data Type</i> code that indicates that these are chargebacks from upstream systems.

Field 5	CCYYDDI
- ואומי	

Length of Field: 7 bytes

Field Type: Alphanumeric

Field Position: 113-119

Description: This field contains the STARS* creation date, which is the date

that American Express transmitted the file to the merchant.

If this file is a retransmission, this field contains the *original*

transmission date. The format is:

CCYYDDD

CC = Century

YY = Year

DDD = Day (Julian date)

For example, October 21st, 2010 would appear as:

2010294

Note: See Julian Date Calendar on page 116.

^{*} STARS = Split, Transmit And Receive System. An American Express developed software utility that supports multiple transmission methods with which data can be exchanged between American Express and its external information trading partners.

Field 6	0HHMMSS	
Length of Field:	7 bytes	
Field Type:	Numeric	
Field Position:	120-126	
Description:	This field contains the <i>file creation time</i> (24-hour format) when the file was prepared for transmission. The format is:	
	OHHMMSS	
	0 = One-digit filler character (zero)	
	нн = Hour (24 hour clock)	
	MM = Minute	
	SS = Second	
	For example, 2:37:00 P.M. would appear as:	
	0143700	

Field 7	FILLER	
Length of Field:	2076 bytes	
Field Type:	Character spaces	
Field Position:	127-2202	
Description:	This field is reserved for future use.	

2.2 CBNOT File Detail Record

Length of Record:	2202 bytes

Description: The Chargeback Notifications (CBNOT) File Detail Record

contains merchant identification, file creation date and time, and number information that are used to identify the file and prevent

duplicate file processing.

See summary table for the CBNOT File Detail Record on page 94.

Field 1 REC_TYPE

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position:

Description: This field contains the constant literal "D", a record type code

that indicates that this is a Chargeback Notifications (CBNOT) File Detail Record. This field must appear as the first item in the

record.

Field 2 FILLER

Length of Field: 5 bytes

Field Type: Character spaces

Field Position: 2-6

Description: This field is reserved for future use.

Field 3	SE N	UMB

Length of Field: 10 bytes

Field Type: Alphanumeric

Field Position: 7-16

Description: This field contains the Service Establishment (SE) Number that

 ${\rm STARS}^*$ searches for and routes data to, based on the setup for the corresponding CBNOT data type (for outbound data).

Field 4 FILLER

Length of Field: 10 bytes

Field Type: Character spaces

Field Position: 17-26

Description: This field is reserved for future use.

^{*} STARS = Split, Transmit And Receive System. An American Express developed software utility that supports multiple transmission methods with which data can be exchanged between American Express and its external information trading partners.

Field 5 CM_ACCT_NUMB

Length of Field: 19 bytes

Field Type: Alphanumeric

Field Position: 27-45

Description: This field contains the Cardmember Account Number that corres-

ponds to this chargeback.

Notes:

1. This is the current Card Account Number that is active at the time of the chargeback. In some instances, this field may be character space filled. For the Original Card Number, refer to

Field 43, CM_ORIG_ACCT_NUM.

Field 6 FILLER

Length of Field: 1bytes

Field Type: Character space

Field Position: 46

Description: This field is reserved for future use.

Field 7 CURRENT_CASE_NUMBER

Field 7[†] CSS_CASE_NUMBER
Field 7[†] SS_CASE_NUMBER
Field 7 FINCAP_TRACKING_ID

Length of Field: 11 bytes

Field Type: Alphanumeric

Field Position: 47-57

Description:

- FINCAP transactions This field contains the *FINCAP Tracking ID*. See FINCAP_TRACKING_ID on page 54.
- Non-FINCAP transactions This field contains the unique, American Express-assigned, *current case (identification) number* for this transaction, if this is a chargeback notification or final resolution.

Notes:

1. For Customer Service Systems, this field is composed of:

Subfield Name	Length	Position
CSS_CASE_NUMBER	7 bytes	47-53
FILLER‡	4 bytes	54-57

2. For SIREN/SOFA, this field is composed of:

Subfield Name	Length	Position
SS_CASE_NUMBER	9 bytes	47-55
FILLER‡	2 bytes	56-57

^{*} As defined for Customer Service Systems.

[†] As defined for SIREN/SOFA System. SIREN = SE Information Retrieval Entry Network. SOFA = SE Online Financial Adjustment. A case processing system that contains unconverted Service Establishment dispute case information and the interfacing financial adjustment system.

[‡] FILLER subfields are character space filled.

Field 8 CURRENT_ACTION_NUMBER

Length of Field: 2 bytes

Field Type: Alphanumeric

Field Position: 58-59

Description: Internal use only.

Field 9 PREVIOUS_CASE_NUMBER Field 9* CSS_P_CASE_NUMBER

Length of Field: 11 bytes

Field Type: Alphanumeric

Field Position: 60-70

Description: This field contains a *case number* from various sources, or is

blank (character space filled), depending on the specific details

of this record.

^{*} As defined for Customer Service Systems.

Field 10 PREVIOUS_ACTION_NUMBER

Length of Field: 2 bytes

Field Type: Alphanumeric

Field Position: 71-72

Description: Internal use only.

Field 11 RESOLUTION

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 73

Description: This field contains a code that indicates if this record is a

Resolution Letter:

Y = Yes

N = No

Note: If this value is "Y", then Field 24 CB_RESOLUTION_

ADJ_NUMBER should be populated.

Field 12	FROM_SYSTEM

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 74

Description: This field contains a code that indicates the *originating system*

that transmitted the file:

F = FINCAP

R = Statement Review

 $S = SIREN/SOFA^*$

T = Triumph

X = Customer Service Systems

P = Enhanced Case Management Platform

G = Globestar

= Other (underline represents a character space)

Note: Internal use only

^{*} SIREN = SE Information Retrieval Entry Network. SOFA = SE Online Financial Adjustment. A case processing system that contains unconverted Service Establishment dispute case information and the interfacing financial adjustment system.

Field 13	REJECTS TO	SYSTEM
i leiu 13	INESECTO TO	

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 75

Constant: None

Description: This field contains a code that indicates the *system* to which

STARS* should forward *rejects*:

R = Statement Review

 $S = SIREN/SOFA^{\dagger}$

T = Triumph

X = Customer Service Systems

P = Enhanced Case Management Platform

G = Globestar

= No rejects (underline represents a character space)

Note: FINCAP does not accept rejects. Internal use only.

^{*} STARS = Split, Transmit And Receive System. An American Express developed software utility that supports multiple transmission methods with which data can be exchanged between American Express and its external information trading partners.

[†] SIREN = SE Information Retrieval Entry Network. SOFA = SE Online Financial Adjustment. A case processing system that contains unconverted Service Establishment dispute case information and the interfacing financial adjustment system.

Field 14 DISPUTES_TO_SYSTEM

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 76

Description: This field contains a code that indicates the *system* to which

STARS* should forward *disputes* from the SE:

R = Statement Review

 $S = SIREN/SOFA^{\dagger}$

T = Triumph

X = Customer Service Systems

P = Enhanced Case Management Platform

G = Globestar

_ = No disputes (underline represents a character space)

Note: The category "no disputes" includes records that are indisputable, like resolutions and transactions from FINCAP.

Internal use only.

^{*} STARS = Split, Transmit And Receive System. An American Express developed software utility that supports multiple transmission methods with which data can be exchanged between American Express and its external information trading partners.

[†] SIREN = SE Information Retrieval Entry Network. SOFA = SE Online Financial Adjustment. A case processing system that contains unconverted Service Establishment dispute case information and the interfacing financial adjustment system.

Field 15 DATE_OF_ADJUSTMENT

Length of Field: 8 bytes

Field Type: Alphanumeric

Field Position: 77-84

Description: This field contains the *date of the adjustment*. The format is:

CCYYMMDD

CC = Century

YY = Year

 $\texttt{MM} \ = \ Month$

DD = Day

For example, the date October 21st, 2010 would appear as:

20101021

Field 16 DATE_OF_CHARGE

Length of Field: 8 bytes

Field Type: Alphanumeric

Field Position: 85-92

Description: This field contains the *date of the charge*. The format is:

CCYYMMDD

CC = Century

YY = Year

 $\texttt{MM} \ = \ Month$

DD = Day

For example, the date October 21st, 2010 would appear as:

20101021

Field 17 AMEX_ID

Length of Field: 7 bytes

Field Type: Alphanumeric

Field Position: 93-99

Description: This field contains the American Express ID number of the

representative that did the adjustment.

Note: Internal use only.

Field 18 FILLER

Length of Field: 5 bytes

Field Type: Character spaces

Field Position: 100-104

Description: This field is reserved for future use.

Field 19 CASE_TYPE

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 105-110

Description: This field contains a code that indicates the *case type* assigned

to this chargeback by American Express. The entry in this field determines the type of response code that appears in the response

file.

AIRDS = Airline Credit Requested

AIRLT = Airline Lost/Stolen Ticket

AIRRT = Airline Returned Ticket

AIRTB = Airline Support of Charge

AREXS = Reservation/Cancellation

CARRD = Car Rental

GSDIS = Goods/Services

NAXMG = Merchandise Not Received

NAXMR = Merchandise Returned

SEDIS = General Dispute

FRAUD = Fraud Dispute

CRCDW = Collision Damage Waiver Liability

Field 20 LOC_NUMB

Length of Field: 15 bytes

Field Type: Alphanumeric

Field Position: 111-125

Description: This field may contain the *store* or *location number* where the

charge occurred. Also, refer to Field 99, LOC_REF_NUMBER.

Field 21 CB_REAS_CODE

Length of Field: 3 bytes

Field Type: Alphanumeric

Field Position: 126-128

Description: This field contains a three-character, *chargeback reason code*.

See Chargeback Reason Codes on page 102.

Field 22	CB AMOUNT

Length of Field: 17 bytes

Field Type: Numeric, signed (see below), with decimal point and two

decimal places, right justified, zero filled

Field Position: 129-145

Description: This field contains the adjustment or *chargeback amount*, which

can be a debit or credit. The format for this field is a one-digit "sign," followed by a 13-digit "dollar amount" (right justified and zero filled), one-digit "decimal point," and two-digit "cents."

For negative amounts, the first-digit "sign" is a negative sign.

For a "negative \$100.00", this would appear as:

12345678901234567

-000000000100.00

For a positive amount, the first-digit "sign" is a blank (character space), which would appear as:

0 I 12345678901234567 0000000000100.00

Note: The underline character (_) represents a character space.

Field 23 CB_ADJUSTMENT_NUMBER

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 146-151

Description: This field contains the *Chargeback Adjustment Number*.

Note: This is the Adjustment Number that appears in the associated financial file and corresponds to the financial

reporting specification.

Field 24 CB_RESOLUTION_ADJ_NUMBER

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 152-157

Description: This field contains the *Chargeback Resolution Adjustment*

Number, if applicable. Normally blank (character space filled), this field is only populated when this record is a combination resolution *and* adjustment (such as in the reversal of a prior

chargeback).

Note: This is the Adjustment Number that appears in the associated financial file and corresponds to the financial

reporting specification.

Field 25 CB_REFERENCE_CODE

Length of Field: 12 bytes

Field Type: Alphanumeric

Field Position: 158-169

Description: This field contains the *merchant's reference number* that was

assigned to the transaction by the merchant when the charge was originated, to help identify this specific charge. For Reference Numbers greater than 12 digits, refer to Field 97 IND_REF_

NUMBER.

Field 26 FILLER

Length of Field: 13 bytes

Field Type: Character spaces

Field Position: 170-182

Description: This field is reserved for future use.

Field 27 BILLED_AMOUNT

Length of Field: 17 bytes

Field Type: Numeric, signed (see below), with decimal point and two

decimal places, right justified, zero filled

Field Position: 183-199

Description: This field contains the *statement bill amount* or *ROC amount*,

which can be a debit or credit. The format for this field is a one-digit "sign," followed by a 13-digit "dollar amount" (right justified and zero filled), one-digit "decimal point," and two-

digit "cents."

For negative amounts, the first-digit "sign" is a negative sign,

which would appear as:

0 1 12345678901234567

-2345678901234.67

For a positive amount, the first-digit "sign" is a blank (character

space), which would appear as:

12345678901234567

_2345678901234.67

Where the underline character represents a character space.

Note: The entries in CB_AMOUNT and BILLED_AMOUNT

fields may differ.

Field 28 SOC_AMOUNT

Length of Field: 17 bytes

Field Type: Numeric, signed (see below), with decimal point and two

decimal places, right justified, zero filled

Field Position: 200-216

Description: This field contains the Summary of Charge (SOC) or Summary

Amount, which can be a debit or credit. The format for this field is a one-digit "sign," followed by a 13-digit "dollar amount" (right justified and zero filled), one-digit "decimal point," and

two-digit "cents."

For negative amounts, the first-digit "sign" is a negative sign,

which would appear as:

0 1 12345678901234567

-2345678901234.67

For a positive amount, the first-digit "sign" is a blank (character

space), which would appear as:

12345678901234567

_2345678901234.67

Where the underline character represents a character space.

Field 29 SOC_INVOICE_NUMBER

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 217-222

Description: This field contains the Summary of Charge (SOC) Invoice

Number that corresponds to the batch in which the merchant

submitted the charge for payment.

Field 30 ROC_INVOICE_NUMBER

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 223-228

Description: This field contains the *Record of Charge (ROC) Invoice Number*

that corresponds to the charge that the merchant submitted for

payment.

Field 31 FOREIGN_AMT

Length of Field: 15 bytes

Field Type: Alphanumeric

Field Position: 229-243

Description: This field contains the *Foreign Amount* (the disputed amount, if

the charge was made in a currency other than US Dollars).

If unused, this field is character space filled.

Field 32 CURRENCY

Length of Field: 3 bytes

Field Type: Alphanumeric

Field Position: 244-246

Description: This field contains the *currency code* that corresponds to the

value in the FOREIGN_AMT field.

See Currency Codes on page 115.

If unused, this field is character space filled.

Field 33 SUPP_TO_FOLLOW

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 247

Description: This field contains a code that indicates whether additional

support is being forwarded. The codes are:

Y = Support is coming via mail or fax.

I = A scanned image provides support.

R = Both forms of support to follow: Mail or fax, and

scanned image.

N = No support.

Field 34 CM_NAME1

Length of Field: 30 bytes

Field Type: Alphanumeric

Field Position: 248-277

Description: This field contains the *Cardmember's name*, concatenated from

the following fields:

CM_FIRST_NAME_1

CM_MIDDLE_NAME_1
CM_LAST_NAME_1

October 2015 Version 3.3 37

Field 35 CM_NAME2

Length of Field: 30 bytes

Field Type: Alphanumeric

Field Position: 278-307

Description: This field contains a secondary Card member name. Usually, this

is the name of a supplemental cardholder to the primary Card

member's account.

Field 36 CM_ADDR1

Length of Field: 30 bytes

Field Type: Alphanumeric

Field Position: 308-337

Description: This field contains the *first line* of the *Card member's street*

address.

Field 37 CM_ADDR2

Length of Field: 30 bytes

Field Type: Alphanumeric

Field Position: 338-367

Description: This field contains the second line of the Card member's street

address.

Field 38 CM_CITY_STATE

Length of Field: 30 bytes

Field Type: Alphanumeric

Field Position: 368-397

Description: This field contains the *city and state* portion of the Card

member's address.

Field 39 CM_ZIP

Length of Field: 9 bytes

Field Type: Alphanumeric

Field Position: 398-406

Description: This field contains the *ZIP code* portion of the Cardmember's

address.

• For U.S. addresses, this is may be a 9-digit "5+4" ZIP code, or a 5-digit ZIP code, left justified and zero filled to 9 digits.

Alphanumeric Canadian postal codes are left justified and

padded with zeros or character spaces.

• If ZIP code is unavailable, this field is zero filled.

Field 40 CM_FIRST_NAME_1

Length of Field: 12 bytes

Field Type: Alphanumeric

Field Position: 407-418

Description: This field contains the *first name* of the Cardmember who made

the charge.

Note: The value in this field is a component of the entry in the

CM_NAME1 field.

Field 41 CM_MIDDLE_NAME_1

Length of Field: 12 bytes

Field Type: Alphanumeric

Field Position: 419-430

Description: This field contains the *middle name* of the Card member who

made the charge.

Note: The value in this field is a component of the entry in the

CM_NAME1 field.

Field 42 CM_LAST_NAME_1

Length of Field: 20 bytes

Field Type: Alphanumeric

Field Position: 431-450

Description: This field contains the *last name* of the Card member who made

the charge.

Note: The value in this field is a component of the entry in the

CM_NAME1 field.

Field 43 CM_ORIG_ACCT_NUM

Length of Field: 15 bytes

Field Type: Alphanumeric

Field Position: 451-465

Description: If the Card member's current account number differs from the

one that generated this chargeback, then this field contains the

original Card account number used for the charge.

Refer also to Field 5, CM_ACCT_NUMB.

Field 44 CM_ORIG_NAME

Length of Field: 30 bytes

Field Type: Alphanumeric

Field Position: 466-495

Description: If the Card member has a different name, this field contains the

Card member's original name at the time the charge was made.

If this field is populated, it contains the Cardmember's original

name, concatenated from the following fields:

CM_ORIG_FIRST_NAME

CM_ORIG_MIDDLE_NAME

CM_ORIG_LAST_NAME

Field 45 CM_ORIG_FIRST_NAME

Length of Field: 12 bytes

Field Type: Alphanumeric

Field Position: 496-507

Description: If the Card member has a different name, this field contains the

Card member's original first name at the time the charge was

made.

Note: The value in this field is a component of the entry in the

CM_ORIG_NAME field.

Field 46 CM_ORIG_MIDDLE_NAME

Length of Field: 12 bytes

Field Type: Alphanumeric

Field Position: 508-519

Description: If the Card member has a different name, this field contains the

Card member's original middle name at the time the charge was

made.

Note: The value in this field is a component of the entry in the

CM_ORIG_NAME field.

Field 47 CM_ORIG_LAST_NAME

Length of Field: 20 bytes

Field Type: Alphanumeric

Field Position: 520-539

Description: If the Card member has a different name, this field contains the

Card member's original last name at the time the charge was

made.

Note: The value in this field is a component of the entry in the

CM_ORIG_NAME field.

Field 48 NOTE1

Length of Field: 66 bytes

Field Type: Alphanumeric

Field Position: 540-605

Description: Case notes may appear in the fields labeled Note1 through

Note7.

Field 49	NOTE2
Length of Field:	78 bytes
Field Type:	Alphanumeric
Field Position:	606-683
Description:	Case notes may appear in the fields labeled Note1 through Note7.

Field 50	NOTE3
Length of Field:	60 bytes
C	·
Field Type:	Alphanumeric
Field Position:	684-743
Description:	Case notes may appear in the fields labeled Note1 through Note7.

Field 51 NOTE4

Length of Field: 60 bytes

Field Type: Alphanumeric

Field Position: 744-803

Description: Case notes may appear in the fields labeled Note1 through

Note7.

Field 52 NOTE5

Length of Field: 60 bytes

Field Type: Alphanumeric

Field Position: 804-863

Description: Case notes may appear in the fields labeled Note1 through

Note7.

Field 53	NOTE6
Length of Field:	60 bytes
Field Type:	Alphanumeric
Field Position:	864-923
Description:	Case notes may appear in the fields labeled Note1 through Note7.

Field 54	NOTE7
Length of Field:	60 bytes
Length of Field.	oo bytes
Field Type:	Alphanumeric
Field Position:	924-983
Description:	Case notes may appear in the fields labeled Note1 through Note7.

Field 55 TRIUMPH_SEQ_NO

Length of Field: 2 bytes

Field Type: Alphanumeric

Field Position: 984-985

Description: This field contains the Triumph Sequence Number and is an

internal field used by American Express.

Field 56 FILLER

Length of Field: 20 bytes

Field Type: Character spaces

Field Position: 986-1005

Description: This field is reserved for future use.

Field 57 FILLER

Length of Field: 15 bytes

Field Type: Character spaces

Field Position: 1006-1020

Description: This field is reserved for future use.

Service Agent Program Only

See Supplemental Field Description for CBNOT File Detail Record, Field 57, SERVICE_AGENT_MERCHANT_ID, on

page 101.

Field 58 FILLER

Length of Field: 10 bytes

Field Type: Character spaces

Field Position: 1021-1030

Description: This field is reserved for future use.

Field 59 AIRLINE_TKT_NUM

Length of Field: 14 bytes

Field Type: Alphanumeric

Field Position: 1031-1044

Description: This record only pertains to airline case types; e.g., CASE_

TYPE = AIRDS, AIRLT, AIRRT or AIRTB). For these case types

this field may contain the airline passenger ticket number.

Field 60 AL_SEQUENCE_NUMBER

Length of Field: 2 bytes

Field Type: Alphanumeric

Field Position: 1045-1046

Description: This record only pertains to airline case types. If this record

involves multiple airline tickets, this field contains the sequence

number.

Field 61	FOLIO_REF
Length of Field:	18 bytes
Field Type:	Alphanumeric
Field Position:	1047-1064
Description:	• If this record pertains to a hotel chargeback, this field contains the <i>hotel reference number</i> (if applicable).
	• For all other transactions — this field is unused and is character space filled.

Field 62	MERCH_ORDER_NUM
Length of Field:	10 bytes
Field Type:	Alphanumeric
Field Position:	1065-1074
Description:	This field contains the <i>merchandise order number</i> (if applicable).

Field 63 MERCH_ORDER_DATE

Length of Field: 8 bytes

Field Type: Alphanumeric

Field Position: 1075-1082

Description: This field contains the *merchandise order date* (if applicable).

The format is:

CCYYMMDD

CC = Century

YY = Year

MM = Month

DD = Day

For example, the date October 21st, 2010 would appear as:

20101021

Field 64 CANC_NUM

Length of Field: 20 bytes

Field Type: Alphanumeric

Field Position: 1083-1102

Description: This field contains the *cancellation number* (if applicable).

Field 65	CANC_DATE
Laurah of Eald.	9 h-4
Length of Field:	8 bytes
Field Type:	Alphanumeric
Field Position:	1103-1110
Description:	This field contains the <i>cancellation date</i> (if applicable). The format is:
	CCYYMMDD
	CC = Century
	YY = Year
	MM = Month
	DD = Day
	For example, the date October 21st, 2010 would appear as:
	20101021

Field 66 FINCAP_TRACKING_ID

Length of Field: 11 bytes

Field Type: Alphanumeric

Field Position: 1111-1121

Description:

• For FINCAP transactions — This field contains the *FINCAP load number* that is composed of the Julian date, the PCID and the sequence number. The format is:

JJJPPPPPPSS

JJJ = Julian date

PPPPPP = PCID

SS = Sequence number

See Julian Date Calendar on page 116.

 For all other transactions — This field is unused and is character space filled.

Note: This field is part of the "FINCAP Area."

Field 67 FINCAP_FILE_SEQ_NUM

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 1122-1127

Description: • For FINCAP transactions — This field contains the *FINCAP*

file sequence number.

• For all other transactions — This field is unused and is

character space filled.

Note: This field is part of the "FINCAP Area."

Field 68 FINCAP_BATCH_NUMBER

Length of Field: 4 bytes

Field Type: Alphanumeric

Field Position: 1128-1131

Description: • For FINCAP transactions — this field contains the FINCAP

batch number.

• For all other transactions — this field is unused and is

character space filled.

Note: This field is part of the "FINCAP Area."

Field 69 FINCAP_BATCH_INVOICE_DT

Length of Field: 8 bytes

Field Type: Alphanumeric

Field Position: 1132-1139

Description: • For FINC.

• For FINCAP transactions — This field contains the *batch invoice date*. The format is:

CCYYMMDD

CC = Century

YY = Year

MM = Month

DD = Day

For example, the date October 21st, 2010 would appear as:

20101021

 For all other transactions — This field is unused and is character space filled.

Note: This field is part of the "FINCAP Area."

Field 70 LABEL1

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1140-1164

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 71 DATA1

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1165-1189

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 72 LABEL2

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1190-1214

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 73 DATA2

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1215-1239

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 74 LABEL3

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1240-1264

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 75 DATA3

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1265-1289

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 76 LABEL4

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1290-1314

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 77 DATA4

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1315-1339

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 78 LABEL5

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1340-1364

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 79 DATA5

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1365-1389

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 80 LABEL6

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1390-1414

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 81 DATA6

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1415-1439

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 82 LABEL7

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1440-1464

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 83 DATA7

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1465-1489

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 84 LABEL8

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1490-1514

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 85 DATA8

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1515-1539

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 86

2.2 CBNOT File Detail Record (Continued)

Length of Field: 25 bytes

LABEL9

Field Type: Alphanumeric

Field Position: 1540-1564

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 87 DATA9

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1565-1589

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 88 LABEL10

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1590-1614

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 89 DATA10

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1615-1639

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 90 LABEL11

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1640-1664

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Note: This field is part of the "Label Data Area."

Field 91 DATA11

Length of Field: 25 bytes

Field Type: Alphanumeric

Field Position: 1665-1689

Description: This field is reserved for use by upstream host systems that may

download *undefined "free form" data*. This field may contain additional information pertaining to the case. If unused, it is

character space filled.

Field 92 CM_ACCNT_NUMB_EXD

Length of Field: 19 bytes

Field Type: Alphanumeric

Field Position: 1690-1708

Description: This field contains the original Card Member account number

that corresponds to this response. If not applicable the current

Card Member Account number will appear.

Field 93 FILLER

Length of Field: 6 bytes

Field Type: Character Spaces

Field Position: 1709-1714

Description: This field is unused and character space filled.

Field 94 CASE_NUMBER_EXD

Length of Field: 16 bytes

Field Type: Alphanumeric

Field Position: 1715-1730

Description: This field contains a *Case Number* from various sources, or is

blank (character space filled), depending on the specific details

of this record.

Field 95 Filler

Length of Field: 35 bytes

Field Type: Alphanumeric

Field Position: 1731-1765

Description: This field is unused and character space filled.

Field 96 IND_FORM_CODE

Length of Field: 2 bytes

Field Type: Alphanumeric

Field Position: 1766-1767

Description: This field contains the two-character, *Industry Format Code*.

If unused, this field is character space filled.

CAPN-Certified Merchants

GP = Gas & Oil Industry

NP = Non-Gas & Oil Industries

Non-CAPN Merchants

GO = Gas & Oil Industry

~~ = Non-Gas & Oil Industries

Note: Tildes (~) represent character spaces.

Field 97 IND_REF_NUMBER

Length of Field: 30 bytes

Field Type: Alphanumeric

Field Position: 1768-1797

Description: This field contains the SE Reference Number assigned to a

transaction by the merchant, at the time the sale is executed.

This SE Reference Number may refer to the location, ROC, order

number, invoice number, or any other merchant-assigned combination of letters and numerals that will assist the merchant

in retrieving supporting documentation in case of inquiry or

other post-transaction correspondence.

This field corresponds to the Invoice Reference Number, Field 26 (Positions 220-249), of the CAPN Submission File TAB record.

Field 98 FILLER

Length of Field: 3 bytes

Field Type: Character spaces

Field Position: 1798-1800

Description: This field is reserved for future use.

Field 99 LOC_REF_NUMBER

Length of Field: 15 bytes

Field Type: Alphanumeric

Field Position: 1801-1815

Description: This field contains the Location Reference Number (a merchant-

assigned name or internal store identifier code) that identifies the individual store or location where the disputed charge occurred;

(i.e., Location Number).

This field corresponds to the Merchant Location ID, Field 19 (positions 127-141), of the CAPN Submission File TAB Record.

Field 100 PASSENGER_NAME

Length of Field: 20 bytes

Field Type: Alphanumeric

Field Position: 1816-1835

Description: This field is used for airline transactions only. It contains the full

(concatenated) Passenger Name associated with the charge.

Note: This field is applicable to the following case types:

AIRDS, AIRLT, AIRRT and AIRTB.

Field 101 PASSENGER_FIRST_NAME

Length of Field: 12 bytes

Field Type: Alphanumeric

Field Position: 1836-1847

Description: This field is used for airline transactions only. It contains the *first*

name of the passenger associated with the charge.

Note: This field is applicable to the following case types:

AIRDS, AIRLT, AIRRT and AIRTB.

Field 102 PASSENGER_MIDDLE_NAME

Length of Field: 12 bytes

Field Type: Alphanumeric

Field Position: 1848-1859

Description: This field is used for airline transactions only. It contains the

middle name of the passenger associated with the charge.

Note: This field is applicable to the following case types:

AIRDS, AIRLT, AIRRT and AIRTB.

Field 103 PASSENGER_LAST_NAME

Length of Field: 20 bytes

Field Type: Alphanumeric

Field Position: 1860-1879

Description: This field is used for airline transactions only. It contains the *last*

name of the passenger associated with the charge.

Note: This field is applicable to the following case types:

AIRDS, AIRLT, AIRRT and AIRTB.

Field 104 SE_PROCESS_DATE

Length of Field: 3 bytes

Field Type: Alphanumeric

Field Position: 1880-1882

Description: This field is used for airline transactions only. It contains the

airline processing date, in Julian date format.

Note: See Julian Date Calendar on page 116.

Note: This field is applicable to the following case types:

AIRDS, AIRLT, AIRRT and AIRTB.

Field 105 RETURN_DATE

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 1883-1888

Description: This field is used for airline transactions only. It contains the

airline ticket Return Date.

The format is: YYMMDD

YY = Year

MM = Month

DD = Day

For example, the date October 21, 2012 would appear as:

121021

Note: This field is applicable to the AIRRT case type only.

Field 106 CREDIT_RECEIPT_NUMBER

Length of Field: 15 bytes

Field Type: Alphanumeric

Field Position: 1889-1903

Description: This field is used for airline transactions only. It contains the

returned-ticket, Credit Receipt Number.

Note: This field is applicable to the AIRRT case type only.

Field 107 RETURN_TO_NAME

Length of Field: 24 bytes

Field Type: Alphanumeric

Field Position: 1904-1927

Description: This field is used for airline transactions only. It contains the

name of the person to whom the ticket was returned.

Note: This field is applicable to the AIRRT case type only.

Field 108 RETURN_TO_STREET

Length of Field: 17 bytes

Field Type: Alphanumeric

Field Position: 1928-1944

Description: This field is used for airline transactions only. It contains the

street address where the ticket was returned.

Note: This field is applicable to the AIRRT case type only.

Field 109 CARD_DEPOSIT

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 1945

Description: This field contains a code that indicates if a *Card deposit* was

given for the reservation.

Y = Yes N = No

U = Unknown

Note: This field is applicable to the AREXS case type only.

Field 110 ASSURED RESERVATION

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 1946

Description: This field contains a code that indicates if the reservation was

assured.

Y = Yes

N = No

Note: This field is applicable to the AREXS case type only.

Field 111 RES_CANCELLED

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 1947

Description: This field contains a code that indicates if the reservation was

cancelled.

Y = Yes

N = No

Note: This field is applicable to the AREXS case type only.

Field 112 RES_CANCELLED_DATE

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 1948-1953

Description: This field contains the *date* when the reservation was cancelled.

The format is: YYMMDD

YY = Year

MM = Month

DD = Day

For example, the date October 21, 2012 would appear as:

121021

Note: This field is applicable to the AREXS case type only.

Field 113 CANCEL ZONE

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 1954

Description: This field contains the *time zone* that corresponds to the time

when the reservation was cancelled.

C = Central P = Pacific

E = Eastern O = Other

M = Mountain

Note: This field is applicable to the AREXS case type only.

Field 114 RESERVATION_MADE_FOR

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 1955-1960

Description: This field contains the *date* for which the reservation was made.

The format is: YYMMDD

YY = Year MM = Month DD = Day

For example, the date October 21, 2012 would appear as:

121021

Note: This field is applicable to the AREXS case type only.

Field 115 RESERVATION_LOCATION

Length of Field: 20 bytes

Field Type: Alphanumeric

Field Position: 1961-1980

Description: This field contains the *location* applicable to the reservation.

Note: This field is applicable to the AREXS case type only.

Field 116 RESERVATION_MADE_ON

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 1981-1986

Description: This field contains the *date* on which the reservation was made.

The format is: YYMMDD

YY = Year MM = Month

DD = Day

For example, the date October 21, 2012 would appear as:

121021

Note: This field is applicable to the AREXS case type only.

Field 117 RENTAL_AGREEMENT_NUMBER

Length of Field: 18 bytes

Field Type: Alphanumeric

Field Position: 1987-2004

Description: This field contains the car *rental agreement number*.

Note: This field is applicable to the CARRD case type only.

Field 118 MERCHANDISE_TYPE

Length of Field: 20 bytes

Field Type: Alphanumeric

Field Position: 2005-2024

Description: This field contains a description of the type of *merchandise* that

was purchased, but not received.

Note: This field is applicable to the NAXMG and NAXMR case

types only.

Field 119 MERCHANDISE_RETURNED

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 2025

Description: This field contains a code that indicates if the merchandise was

returned.

Y = Yes

N = No

Note: This field is applicable to the NAXMR case type only.

Field 120 RETURNED_NAME

Length of Field: 24 bytes

Field Type: Alphanumeric

Field Position: 2026-2049

Description: This field contains the *name* of the location to which the

merchandise was returned.

Note: This field is applicable to the NAXMR case type only.

Field 121 RETURNED_DATE

Length of Field: 6 bytes

Field Type: Alphanumeric

Field Position: 2050-2055

Description: This field contains the *date* that the merchandise was returned.

The format is: YYMMDD

YY = Year

MM = Month

DD = Day

For example, the date October 21, 2012 would appear as:

121021

Note: This field is applicable to the NAXMR case type only.

Field 122 RETURNED_HOW

Length of Field: 8 bytes

Field Type: Alphanumeric

Field Position: 2056-2063

Description: This field contains the *method* used to ship the returned

merchandise.

Note: This field is applicable to the NAXMR case type only.

Field 123 RETURNED_REASON

Length of Field: 50 bytes

Field Type: Alphanumeric

Field Position: 2064-2113

Description: This field contains free-form text that explains the *reason* why

the merchandise was returned.

Note: This field is applicable to the NAXMR case type only.

Field 124 STORE_CREDIT_RECEIVED

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position: 2114

Description: This field contains a code that indicates if the store or business

issued a *credit* for returned merchandise.

Y = Yes N = No

Note: This field is applicable to the NAXMR case type only.

Field 125 FILLER

Length of Field: 15 bytes

Field Type: Character spaces

Field Position: 2115-2129

Description: This field is unused and character space filled.

Field 126	FILLER
Length of Field:	73 bytes
Field Type:	Character spaces
Field Position:	2130-2202
Description:	This field is unused and character space filled.

2.3 CBNOT File Trailer Record

Length of Record:	2202 bytes		
Description:	The Chargeback Notifications (CBNOT) File Trailer Figure 2 contains merchant identification, file creation date and number information that are used to identify the file and duplicate file processing.	l time, a	
Fields in This Section:	1. REC_TYPE	Page	88
	Amex Application Area		
	2. AMEX_APPL_AREA		88
	STARS Area		
	3. SAID		89
	4. DATATYPE		89
	5. CCYYDDD		90
	6. OHHMMSS		91
	7. STARS_FILESEQ_NB		92
	8. FILLER		92

See summary table for the CBNOT File Trailer Record on page 97.

Field 1 REC_TYPE

Length of Field: 1 byte

Field Type: Alphanumeric

Field Position:

Description: This field contains a code that identifies the *record type*. The

constant literal "T" indicates that this is a CBNOT File Trailer Record. This field must appear as the first item in the record.

Field 2 AMEX_APPL_AREA

Length of Field: 100 bytes

Field Type: Alphanumeric

Field Position: 2-101

Description: This field contains the internal American Express data below:

Subfield Name	Length	Position	Comments
APPLICATION_SYSTEM_CODE	2 bytes	2-3	Constant `01'
FILE_TYPE_CODE	2 bytes	4-5	Constant `01'
FILE_CREATION_DATE	8 bytes	6-13	Format: YYYYMMDD
FILLER	6 bytes	14-19	Reserved for future use (character space filled)
FILE_SEQUENCE_NUMBER	2 bytes	20-21	American Express - assigned processing control number, currently unused (zero filled)
JULIAN_DATE	5 bytes	22-26	Currently unused (zero filled)
AMEX_TOTAL_RECORDS	9 bytes	27-35	Total record count
CONFIRM_RECORD_COUNT	9 bytes	36-44	Total record count
AMEX_JOB_NUMBER	5 bytes	45-49	American Express - assigned job number, currently unused (character space filled)
FILLER	52 bytes	50-101	Reserved for future use (character space filled)

Description:

2.3 CBNOT File Trailer Record (Continued)

Field 3	SAID	
Length of Field:	6 bytes	
Field Type:	Alphanumeric	
Field Position:	102-107	

This field contains the American Express-assigned, six-character, *Service Access ID (SAID)*.

Field 4 DATATYPE Length of Field: 5 bytes Field Type: Alphanumeric Field Position: 108-112 Description: This field contains a code that corresponds to the *data type*. The constant literal "CBNOT" indicates that these are "chargeback notifications" from upstream systems.

Field 5 CCYYDDD

Length of Field: 7 bytes

Field Type: Alphanumeric

Field Position: 113-119

Description: This field contains the *file creation date*. The format is:

CCYYDDD

CC = Century

YY = Year

DDD = Day (Julian date)

For example, October 21st, 2010 would appear as:

2010294

Note: See Julian Date Calendar on page 116.

Field 6	0HHMMSS
Length of Field:	7 bytes
Field Type:	Numeric
Field Position:	120-126
Description:	This field contains the <i>file creation time</i> . The format is:
	0HHMMSS
	0 = One-digit filler character (zero)
	HH = Hour (24 hour clock)
	MM = Minute
	SS = Second
	For example, 2:37:00 P.M. would appear as:
	0143700

Field 7 STARS_FILESEQ_NB

Length of Field: 3 bytes

Field Type: Numeric

Field Position: 127-129

Description: This field contains the STARS* file sequence number. This

constant number is set to "001".

Field 8 FILLER

Length of Field: 2073 bytes

Field Type: Character spaces

Field Position: 130-2202

Description: This field is reserved for future use.

^{*} STARS = Split, Transmit And Receive System. An American Express developed software utility that supports multiple transmission methods with which data can be exchanged between American Express and its external information trading partners.

4.0 Appendix

The appendix contains the following subsections:

- 4.1 Supplemental Field Descriptions for Service Agent Use Only
- 4.2 Chargeback Reason Codes
- 4.3 Country & Currency Codes
- 4.4 Julian Date Calendar Standard Year
- 4.5 Julian Date Calendar Leap Year (2012, 2016, 2020, etc.)

4.1 Supplemental Field Descriptions for Service Agent Use Only

The field in this subsection is redefined for *Service Agent* use only. When applicable, this field definition replaces the corresponding "FILLER" field in the following Detail Record:

• CBNOT File Detail Record (see pages 12-72).

4.1.2 Service Agent Supplemental Field Description for CBNOT File Detail Record

Field 57	SERVICE_AGENT_MERCHANT_ID
Length of Field:	15 bytes
Field Type:	Alphanumeric
Field Position:	1006-1020
Constant:	None
Description:	This field contains the external, third party <i>Service Agent Merchant ID</i> number.

Reason Code

Description

Chargeback Adjustments

A01 The amount of the Authorization Approval was less than the amount of the Charge you submitted.

Support required to request a Chargeback Reversal:

- Proof that a valid Authorization Approval was obtained for the full amount of the Charge in accordance with the Agreement unless exceptions apply, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- A02 The Charge you submitted did not receive a valid Authorization Approval; it was declined or the Card was expired.

Support required to request a Chargeback Reversal:

- Proof that a valid Authorization Approval was obtained in accordance with the Agreement, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- A08 The Charge was submitted after the Authorization Approval expired.

Support required to request a Chargeback Reversal:

- Proof that a valid Authorization Approval was obtained in accordance with the Agreement, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- C02 We have not received the Credit (or partial Credit) you were to apply to the Card.

Support required to request a Chargeback Reversal:

- If no Credit (or only partial Credit) is due, a written explanation of why credit is not due with appropriate documents to support your position, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

C04 The goods or services were returned or refused but the Cardmember did not receive Credit.

Support required to request a Chargeback Reversal:

- Written explanation refuting the Cardmember's claim that goods were returned to your business, or
- If returned: A copy of your return policy, an explanation of your procedures for disclosing it to the Cardmember, and details explaining how the Cardmember did not follow the return policy, or
- A copy of the Charge Record indicating the terms and conditions of the purchase with details explaining how the Cardmember did not follow the policy, or
- If goods/services refused: Proof that the goods/services were accepted (e.g. signed delivery slip if the goods were delivered, screen print showing use of the service if service was provided via internet), or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- C05 The Cardmember claims that the goods/services ordered were cancelled.

Support required to request a Chargeback Reversal:

- A copy of your cancellation policy, an explanation of your procedures for disclosing it to the Cardmember, and details explaining how the Cardmember did not follow the cancellation policy, or
- A copy of the Charge Record indicating the terms and conditions of the purchase and details explaining how the Cardmember did not follow the policy, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

C08 The Cardmember claims to have not received (or only partially received) the goods/services. Support required to request a Chargeback Reversal:

- Proof of Delivery including delivery date and full shipping address, or
- Proof that the services were provided and the dates the services were provided, or
- Signed completion of work order showing the Cardmember received the services and dates that the services were used/provided, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- C14 The Cardmember has provided us with proof of payment by another method.

Support required to request a Chargeback Reversal:

- Documentation showing that the Cardmember's other form of payment was not related to the Disputed Charge, or
- Proof that the Cardmember provided consent to use the Card as a valid form of payment for the Disputed Charge, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- C18 The Cardmember claims to have cancelled a lodging reservation or a Credit for a CARDeposit Charge was not received by the Cardmember.

Support required to request a Chargeback Reversal:

- Documentation that supports the validity of the "no show" reservation or CARDeposit Charge, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

C28 Cardmember claims to have cancelled or attempted to cancel Recurring Billing Charges for goods or services. Please discontinue all future billing for this Recurring Billing Charge.

Support required to request a Chargeback Reversal:

- A copy of your cancellation policy, an explanation of your procedures for disclosing it to the Cardmember, and details explaining how the Cardmember did not follow the cancellation policy, or
- Proof that the Cardmember has not cancelled and continues to use the service or receive the goods, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- C31 The Cardmember claims to have received goods/services that are different than the written description provided at the time of the Charge.

Support required to request a Chargeback Reversal:

- Proof refuting the Cardmember's claim that the written description differs from the goods/services received, or
- Proof that the Cardmember agreed to accept the goods/services as provided, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- C32 The Cardmember claims to have received damaged or defective goods/services.

Support required to request a Chargeback Reversal:

- Proof refuting the Cardmember's claim that the goods/services were damaged or defective (provided that, in the case of goods, they were not returned to you), or
- Proof that the Cardmember agreed to accept the goods as delivered, or
- Proof that the goods/services were not returned to you, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

F10 The Cardmember claims they did not participate in this Charge and you have not provided a copy of an imprint of the Card.

Note: Not applicable to Card Not Present Charges or Charges that qualify under the Keyed No Imprint Program.

Support required to request a Chargeback Reversal:

- Proof that the Charge qualifies under the Keyed No Imprint Program, or
- Proof that this was a Card Not Present Charge, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- F14 The Cardmember claims they did not participate in this Charge and you have not provided a copy of the Cardmember's signature to support the Charge.

Note: Not applicable to Card Not Present Charges, Charges at CATs or Charges that qualify under the No Signature Program.

Support required to request a Chargeback Reversal:

- Proof that this was a Card Not Present Charge, or
- Proof that the Charge qualifies under the No Signature Program, or
- Proof that the Charge was completed at a Customer Activated Terminal, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- F22 The Cardmember denies participation in the Charge you submitted and the Card was expired or was not yet valid when you processed the Charge.

Support required to request a Chargeback Reversal:

- Proof that you obtained an Authorization Approval, or
- Proof that the Charge was incurred prior to the Card Expiration Date or within the Valid Dates, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

F24 The Cardmember denies participation in the Charge you submitted and you have failed to provide proof that the Cardmember participated in the Charge.

Support required to request a Chargeback Reversal:

- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- F29 The Cardmember denies participation in a mail order, telephone order, or internet Charge.

Support required to request a Chargeback Reversal:

- Proof that the Cardmember participated in the Charge (e.g. billing authorization, usage details, contract), or
- Proof that you attempted to validate the CID and you did not receive a response or you received an "unchecked" response, or
- Proof that you validated the address via Authorization and shipped goods to the validated address, or Proof that a Credit which directly offsets the Disputed Charge has already been processed
- F30 A counterfeit Chip Card was used at a terminal that was not capable of processing a Chip Card Transaction.

Note: Not applicable to Card Not Present Charges, or Charges identified as Fallback.

Support required to request a Chargeback Reversal:

- Proof that a correcting Transaction, which directly offsets the disputed Transaction, has already been processed
- Proof that the Transaction was Card Not Present
- Proof that the terminal processed a Chip-Card Transaction

Reason Code Description

F31 A lost/stolen/non-received Chip Card was used at a terminal that was not capable of processing a Chip Card Transaction with PIN validation.

Note: Not applicable to Card Not Present Charges, or Charges identified as Fallback.

Support required to request a Chargeback Reversal:

- Proof that a correcting Transaction, which directly offsets the disputed Transaction, has already been processed
- Proof that the Transaction was Card Not Present
- Proof that the terminal processed a Chip Card Transaction with PIN validated
- FR2 The Cardmember denies authorizing the Charge and your Establishment has been placed in the Fraud Full Recourse Program.

Support required to request a Chargeback Reversal:

- Proof that you had not been placed in the Fraud Full Recourse Program at the time of the Chargeback, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- FR4 The Cardmember has disputed the Charge and you have been placed in the Immediate Chargeback Program.

Support required to request a Chargeback Reversal:

- Proof that you had not been placed in the Immediate Chargeback Program at the time of the Chargeback, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- FR5 Your account is on the Immediate Chargeback program. Under these circumstances, disputed charges are debited from your account with no further recourse. These chargebacks cannot be reversed unless you issue a credit to the account, or the Cardholder advises the charge(s) are valid.

Reason Code Description

FR6 The Cardmember has disputed the Charge and you have been placed in the Partial Immediate Chargeback Program.

Support required to request a Chargeback Reversal:

- Proof that you had not been placed in the Partial Immediate Chargeback Program at the time of the Chargeback, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- M01 We have received your authorization to process Chargeback for the Charge.

Support required to request a Chargeback Reversal:

- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- M10 The Cardmember claims to have been incorrectly billed for Capital Damages.

Support required to request a Chargeback Reversal:

- Proof that the Cardmember agreed to and signed an acknowledgement of responsibility for Capital Damages and that the Charge did not exceed 110% of the agreed-upon amount, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- M49 The Cardmember claims to have been incorrectly Charged for theft, loss of use, or other fees related to theft or loss of use of a rental vehicle.

Support required to request a Chargeback Reversal:

- Proof that the Charge was valid and not for theft, loss of use, or other fees related to theft or loss of use of the rental vehicle, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

P01 You have submitted a Charge using an invalid or otherwise incorrect Card Number.

Note: You may resubmit the Charge to us if you are able to verify and provide the correct Card Number.

Support required to request a Chargeback Reversal:

- Copy of the imprint that confirms Card Number, or
- Proof that you obtained an Authorization Approval for such Card Number, or
- Copy of the Charge Record from the terminal that electronically read the Card Number, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- P03 The Cardmember claims the Charge you submitted should have been submitted as a Credit. Support required to request a Chargeback Reversal:
 - Proof that the Charge was submitted correctly, or
 - Proof that a Credit which directly offsets the Charge has already been processed
- P04 The Cardmember claims the Credit you submitted should have been submitted as a Charge. Support required to request a Chargeback Reversal:
 - Proof that the Credit was submitted correctly, or
 - Proof that a Charge that directly offsets the Credit has already been processed
- P05 The Charge amount you submitted differs from the amount the Cardmember agreed to pay. Support required to request a Chargeback Reversal:
 - Proof that the Cardmember agreed to the amount submitted, or
 - Proof that the Cardmember was advised of and agreed to pay for any additional or delayed Charges using the Card the Charge was submitted to, or
 - Itemized contract/documentation substantiating the Charge amount submitted, or
 - Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

P07 The Charge was not submitted within the required timeframe.

Support required to request a Chargeback Reversal:

- Proof the Charge was submitted within the required timeframe, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- P08 The individual Charge was submitted more than once.

Support required to request a Chargeback Reversal:

- Documentation showing that each Charge is valid, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- P22 The Card Number in the Submission does not match the Card Number in the original Charge. Support required to request a Chargeback Reversal:
 - Copy of the Card imprint confirming the Card Number, or
 - Copy of the Charge Record from the terminal that electronically read the Card Number, or
 - Proof that a Credit which directly offsets the Disputed Charge has already been processed
- P23 The Charge was incurred in an invalid currency.

Support required to request a Chargeback Reversal:

- Proof that a Credit which directly offsets the Disputed Charge has already been processed
- R03 Complete support and/or documentation were not provided as requested.

Support required to request a Chargeback Reversal:

Proof that a Credit which directly offsets the Disputed Charge has already been processed

Reason Code Description

R13 We did not receive your response to our Inquiry within the specified timeframe.

Support required to request a Chargeback Reversal:

- Proof you responded to the original Inquiry within the specified timeframe, or
- Proof that a Credit which directly offsets the Disputed Charge has already been processed

Chargeback Reversal Adjustments

- M11 We recently debited your account for the adjustment amount indicated. We have now received your credit for this charge and we are reversing the debit and crediting your account.
- M38 We recently debited your account for the adjustment amount indicated. We are now reversing the debit and crediting your account

Non-Dispute Adjustments

- M19 According to our records, your credit was inadvertently deducted from another merchant's account. This has now been corrected, and a debit for this amount will be issued. We apologize for any inconvenience this may have caused.
- M21 Our records indicate that your charge or summary was inadvertently paid to another merchant. This has been corrected and a credit has been issued.
- M22 Our records indicate that your service establishment was inadvertently paid for a submission sent to us by another service establishment. To correct this erroneous payment, an adjustment debiting your account has been processed.
- M23 A review of our records indicates that your service establishment inadvertently cashed a check that belonged to another service establishment. To correct this erroneous payment, an adjustment debiting your account for the amount of this check has been processed. Please submit your charges to cover this amount, or send us a check as soon as possible.
- M24 We have processed an adjustment transferring a debit balance from your previous account to the account listed. This balance owed us was aging on an account that is no longer active.
- M25 Our records indicate that your affiliated account has an outstanding debit balance. This debit has not cleared because charges are no longer being submitted by this account. Consequently, we have processed an adjustment to transfer this debit to your account.
- M27 Your cheque was returned to us by your bank. Since your account was previously credited for this cheque, we are debiting your account for the amount involved. Please send us a replacement cheque immediately.

Reason Code	Description
M28	According to our records, an incorrect discount rate was applied to your summaries. Since the rate should have been lower, credit has been issued.
M29	The invoice and report provided includes details regarding discount fees for American Express charges processed for the month indicated. This invoice amount will be debited to your bank account.
M32	We have processed an adjustment to your account. This adjustment represents your share of the media costs incurred in your participation in our cooperative advertisement program.
M33	In accordance with your request, an adjustment to your account has been processed.
M39	We have issued an adjustment to your account to correct a transaction that was previously processed in error.
M43	We have processed an adjustment to your account. This adjustment represents your participation in American Express Marketing Programs. Our records indicate a recent change in payment options for your participation. Therefore, future adjustments will be invoiced on a monthly frequency
M44	We have processed an adjustment to your account. This adjustment represents your participation in American Express Marketing Programs. Our records indicate a recent change in payment options for your participation. Therefore, future adjustments will be deducted on a monthly frequency from payments for charges submitted.
M45	A review of our records indicates that a cheque was applied to your account in error. Therefore an adjustment has been processed to debit your account.
M46	We have determined that your establishment was inadvertently debited for item(s) which were submitted to us by another establishment. To correct this erroneous debit, an adjustment crediting your account has been processed, and will be included in a future statement.
P09	We have processed duplicate payments to your account for the same transaction.
	Informational Chargeback Reason Codes
M02	The Cardmember no longer disputes the charge(s). Please discontinue further investigation.
M04	We previously received your authorization to debit your account. Please deal directly with the Cardholder for resolution on this matter.
M36	Please see the additional notes related to this dispute.
M42	Due to the length of time between the chargeback to your account and receiving your dispute, we are unable to review this for reversal.
S01	Your request for a chargeback reversal has been reviewed. The chargeback will remain, and your account will not be credited.

Reason Code	Description
S03	Support received.
S04	We have received your request for a chargeback reversal. Please allow 2 to 3 weeks for research.

Note: A portion of each reason code indicates the reason-type:

A__ = Authorization

 C_{--} = Cardmember Dispute

 $F_{-} = Fraud$

FR_ = Full Recourse

M _ _ = Miscellaneous Adjustments and Resolutions

P__ = Processing Error
R__ = Retrieval/Support
S__ = Status Updates

4.3 Country & Currency Codes

Note: At this writing, only the country and currency codes in this subsection are used in the files described in this specification. Please contact your American Express Technical Representative if your business uses codes other than those that appear below.

4.3.1 Country Codes

Country Codes

	Country Code					
Country or Entity Name	Num	Alpha				
Canada	124	CAN				
United States	840	USA				

4.3.2 Currency Codes

Currency Codes

Note: For Currency Usage, S = Approved, X = Prohibited, Blank = May have restrictions.

		Currency Code			Currency	
Country or Entity Name	Currency Name	Num	Alpha	Usage	Dec	
Canada	Canadian Dollar	124	CAD	S	2	
United States	U.S. Dollar	840	USD	S	2

5.0 Revision Log

Version		Date Content Owner Prepared By Description								
•	3.2	03/13/15 B.Hurst Release as v3.2 • Expanded Filler Fields for CM_ACCOUNT_NO_EXD and CASE_NUMBER_EXD • Record 92 : Label 12 split into 92, 93 Record 93 : Data 12 split into 94,95								
•	3.2	8/13/2012 B. Hurst V. Clark Release as V3.2 • Extended the 15 byte CM_ACCT_NUMB field 5 to 19 bytes using 5 byte field 6 filler.								
• 3.2		 8/13/2012 M. Wasson K.Call Release as v3.0 to align with American Express global disputes policy. Page 6, Removed reference: "These records are used to send chargeback/adjustment notifications from upstream systems, through STARS, to SEW, SEWO, and third party software that can be used to access the data supplied by American Express Page 6, Removed Footnote: "SEFEC = SE Fully Electronic Communications — An American Express system that sends chargeback and adjustment notifications from upstream systems, through STARS, to SEW, SEWO and third party software that can be used to access the data supplied by American Express. SEW = SE Workstation — An American Express, Windows-based, PC software product that enables SEs to automate credit card back office processing, electronically track and record American Express submissions, receive Cardmember inquiries (significantly reducing "no-reply" chargebacks), quickly check payment status, and reduce paperwork and mailing expenses. SEWO = SE Workstation OnLine (via Internet), a.k.a. SEWOL —An Amex-only product accessed through "www.americanexpress.com" that allows SEs to access SE Workstation features "online." This web site also provides information on other American Express products and services." Page 15, Updated CBNOT File Detail Record Summary Table to reflect the new fields 100 through 125. Filler 99 replaced with Passenger_Name Page 29-100, Removed reference to SEFEC in the following sections: 4.0 and Field 21 Page 29, Updated reference in the CB_Reference_Code, Field 25 Page 73-86, Added fields 100 through 125 to the chargeback detail record section. Page 92-93, Table updated to include modified field 99 (from FILLER to Passenger_Name), and add fields 100 - 125. Page 102-114, Changed 4.2 Header SEFEC 1.2 to "Chargeback Reason Codes". Page 102-114, Changed 4.2 Header SEFEC 1.2 to "Chargeback Reason Codes". Page 102-114, F22, F24, FR2, F								
	2.0	10/21/10 M. Wasson R. Wong See Below Released as v2.0 to align Revision Number with POS020065 and -2.								

5.0 Revision Log

Version | Date | Content Owner | Prepared By | Description

- Added new cover and moved reformatted Revision Log to end of document.
- Global: Changed from "Service Establishment (SE)" to "Merchant".
- Global: Changed "Chargeback File" to "Chargeback Notifications (CBNOT) File" or "CBNOT File"
- Page 5, Related Documents: Added POS020065 and POS020065-2.
- Page 8, AMEX_APPL_AREA: Changed FILLER subfield from "Alphanumeric" to "Reserved for future use (character space filled)".
- Pages 10, 25, 26, 52, 53, 56, 90: Changed year used in example from "2008" to "2010".
- Pages 11, 32, 48-49, 71, (Filler 99 deleted) and corresponding Record Summary Table entries: Changed FILLER fields from "Numeric" or "Alphanumeric" to "Character spaces".
- Page 13, 48-49, 95: Added and/or modified FILLER fields 56, 57 and 58, and renumbered remaining fields, to allow CBNOT Detail Record positions 1006-1020 to transport Service Agent Program data. For details, see pages 49 and 101.
- Page 23, REJECTS TO SYSTEM: Deleted "Required Field: Yes", which was missed during v1.2 update.
- Pages 100-101: Added subsection entitled "Supplemental Field Description for Service Agent Use Only" and Field 57, SERVICE_AGENT_MERCHANT_ID.

1.2 | 11/21/08 | M. Wasson | R. Wong | See Below

- Global: Deleted "Constant" and "Required Field" information from all detailed Field Descriptions.
- Global: Changed "year" text & examples in all "date" fields from 1999 to 2009.
- Pages 7, 11 & 94: Expanded FILLER & deleted STARS_FILESEQ_NB, FILE_BATCH_ID, UNITECH_HDR_FILE_SEQ_NUM, UNITECH_ HDR_BUSINESS_DTE & CLIENT_AREA.
- Page 8: Deleted PCID & FILE_SEQUENCE_ NUMBER in subfield table.
- Page 13: Changed subheading from "CSS Area Fields" to "Industry Data Fields".
- Pages 13, 48 & 95: Changed TRIUMPH_AREA field name to TRIUMPH_SEQ_NO.
- Page 17, Field 4: Changed XREF_SE_NUMB to FILLER.
- Page 18, Note: Deleted "In some instances, this field may be character space filled" & added "This is the current Card Account Number that..."
- Pages 20 & 21: Replaced Description text with "Internal use only".
- Page 20, PREVIOUS_CASE_NUMBER: Deleted part of the Description text.
- Page 21: Added "Note: If this value is "Y"..."
- Page 22: Added code "G", " = Other..." and "Note: Internal use only".
- Page 23: Added code "G", "_ = No rejects..." and "Internal use only".
- Page 24: Added code "G" & "Internal use only".
- Page 27: Deleted AMEX ID examples and changed Note to "Internal use only".
- Page 28: Added code "CRCDW".
- Page 29: Added text indicated "This field <u>may</u> contain...", and added "Also, refer to Field 94, LOC REF NUMBER".
- Page 31, CB_ADJUSTMENT_NUMBER & CB_ RESOLUTION_ADJ_NUMBER: Added "Note: This is the Adjustment Number that appears in the associated..."
- Page 32: Changed Length of Field from 25 bytes to 12, created Field 26, FILLER, with remaining 13 bytes, adjusted Field Positions and added "For Reference Number greater than 12 digits, refer to Field 92, IND REF NUMBER".
- Page 34: Deleted text indicated "... or Summary Amount (for FINCAP and SIREN/SOFA), which can be a
 debit or credit."
- Page 42: Added "Refer also to Field 5, CM ACCT NUMB.
- Pages 44-47, Note1 through Note7: Changed Description to "Case notes may appear in the fields labeled

5.0 Revision Log

Version Date | Content Owner | Prepared By | Description Note1 through Note7." Page 48: Deleted TRIUMPH_SEQ_NO secondary field name "FILLER 1", changed Length of Field from 47 bytes to 2, added FILLER (Field 56) with remaining bytes, deleted Triumph subfield table and replaced Page 50, AIRLINE TKT NUM: Added "This record only pertains to airline case types" and deleted part of the Description text. Page 51, FOLIO REF: Deleted references to "CSS". Page 51, 52, 53, MERCH_ORDER_NUM & MERCH_ORDER_DATE, CANC_NUM, CANC_DATE: Deleted references to "CSS" and second bullet "For all other transactions...' Pages 57-Error! Bookmark not defined., LABEL1 through LABEL12 and DATA1 through DATA12: Added "This field may contain additional information pertaining to the case." Page 71: Added "This field corresponds to the Invoice Reference Number, Field 26 (positions 220-249) of the CAPN Submissions File TAB Record." Page 72: Added "...(i.e., Location Number)" and "This field corresponds to the Merchant Location ID, Field 19 (positions 127-141) of the CAPN Submissions File TAB Record." Page 88: Changed subfield names from PCID to FILLER and from SE_TOTAL_RECORDS to CONFIRM_RECORD_COUNT. Page 92: Replaced text "Each day this number resets to '001' and increments by one for each file sent," with "This constant number is set to '001'". Page 92: Deleted CLIENT_AREA and FILLER (Field 10). Then, adjusted FILLER (Field 8) to absorb remaining bytes. Page 115: Deleted COBOL Record Layout (section). 09/25/07 | D. Moore | R. Wong | See Below 1.1 Pages 102-114: Updated Chargeback Reason Codes. 1.0 11/16/06 | D. Moore | R. Wong | See Below Initial release. Created new "Global" spec using POS020025-1, v1.3, as template. See comparison document for details.
